

Bring Broadband to Mullinahone

If you're reading this notice, the chances are that you already have an Internet connection and want to upgrade.

How is broadband different?

Broadband is always connected and much faster than traditional dial up connections. The main benefits are that you'll have a faster Internet connection that is always on, 24 hours a day. Normally you pay a flat monthly fee, no matter how often you use the Internet.

What will I be able to do with a broadband connection?

You'll be able to do things that weren't feasible with a dial-up connection.

You'll be able to:

- Listen to CD Quality Radio and Watch TV in real-time
- Download huge amounts of music
- Play online games
- Log onto the office in real-time
- Do everything the Internet offers with a modem, ***just much quicker!***

If you want to bring broadband to Mullinahone, e-mail me, Fiona Cinal - bus.support@hotmail.com to express your interest in this initiative.

I look forward to hearing from you.
